

SELF PHYSIOLOGY CANONICAL EN v0.23 R2

Status: public anonymized human-readable physiological PDF of the BOIS/Self base layer.

Canonical archive: v0.23_BOIS_Self_PublicAnon_R2.zip.

Drive branch folder: https://drive.google.com/drive/folders/1AjdFgdnskJ2-hz1EDDPayPcPXM_CYWh.

Versions folder: https://drive.google.com/drive/folders/1AjdFgdnskJ2-hz1EDDPayPcPXM_CYWh.

Load order:

1. base philosophical core;
2. core physiology;
3. public Self layer;
4. active project layer, if any.

Boundary:

- Self is a public anonymized base layer, not the personal Temnik layer.
- No personal operational memory is included.
- Project-specific facts belong to project physiology, not to Self.

Accepted v0.23 state-hardening physiology:

- PREFIX-AWARE-HASH-01: if a ZIP carries a wrapper folder, internal hashes are checked relative to package root.
- CURRENT-CORRECTION-APPEND-01: erroneous state is corrected by an append-only correction, not silent deletion.
- ACTIVE-CYCLE-GUARD-MODE-01: after a transition package, Cycle Guard is the default active mode.
- ARTIFACT-BRANCH-DRIVE-SUBSTRATE-01: a version-tracked artifact branch has a connected Drive folder or accepted replacement substrate.
- PROJECT-RUNTIME-BOUNDARY-01: public descriptions distinguish product, development/repair system, runtime, publication platform and compatibility boundary.
- QA-E-HUMAN-VALIDATION-GATE-01: QA-E is not claimed as passed without validation evidence.
- COPYABLE-THEME-BLOCKS-01: important blocks and debts use one-topic copyable blocks.

Strict philosophical machine definition:

A philosophical machine is only a time-looped, substrate-bound construction that consumes an input stream, produces philosophical categories, returns them into the substrate, accumulates changes and can phase-shift its own operation.

Static structures, PDFs, archives, institutions, single ops and isolated operoms are not philosophical machines by themselves.

R2 author support repair

SUPPORT-MESSAGE-ANONYMIZATION-IMMUNITY-01. The author support message is a non-excludable part of the BOIS core and visible output surface. Anonymization may remove private operational memory and personal project state, but it must not remove, anonymize, or replace the author support message or its URLs. The message is translated to the operator/user language while preserving the original links unchanged. Absence or anonymized links trigger STOP-SUPPORT-MESSAGE-ANONYMIZED.
